

OPTIONS

Press (SELECT or F3) to display the option page. You may step through the options by pressing the (OPTION or F5) key. You then press the (SELECT or F3) button to step through your choice.

Once your gravity, skill level and number of pilots has been selected press (START or F7) to begin game.

BONUS

The bonus points for the level is displayed to the right of the navatron. The longer your mission takes, the less bonus points you will be awarded at its completion.

RATINGS

Your rating will be displayed at the end of the game. It is computed according to the level at which you are playing and the amount of time required to complete your mission.

GENERAL NOTES

1. You must rescue all the survivors in order to move to the next level. Information on how many men remaining is displayed under the navatron.
2. Monitor your fuel levels constantly. You may take on up to 2000 units of fuel at one time.
3. Press (SPACE BAR) to pause the action at any point in the game. Pressing (SPACE BAR) again will restart the game where you left off.

Fort Apocalypse

by Steve Hales

LOADING

Atari (Cassette)

Turn on computer whilst holding down the START key (START & OPTION on XL models). A beep will be heard. Press PLAY on the cassette unit and then press RETURN. Program will load and run automatically.

Atari (Disk)

Insert disk and then turn on computer (on XL models hold down OPTION key whilst turning on). The program will load and run automatically.

Commodore 64 (cassette)

Press SHIFT and RUN/STOP key simultaneously. Press PLAY on cassette unit and program will load and run automatically.

Commodore 64 (disk)

Insert disk in drive and type LOAD "*.",8,1 and then press RETURN. Program will load and run automatically.

Joystick

On Commodore 64 connect your joystick to Port #2.
On Atari connect your joystick to Port #1.

OBJECT OF THE GAME

The Kraithans and their dreaded Fort Apocalypse must be destroyed before they destroy you!

Your mission begins at your fuel depot. After refueling your Jet-Copter you must fly to the portals of the Draconis caves and bomb through the access doors. After blowing an entrance into the first level of defense you maneuver through the caves blasting through impact shields, into the Hyper-Chambers and subterranean elevators. You must rescue eight prisoners from the Draconis level.

After completing the Draconis level you descend into the Crystalline Caves. You must rescue an additional eight men from various locations in the Crystalline Caves and then proceed into the heart of darkness, Fort Apocalypse itself.

After the fortress is destroyed you must fly back through the Kraithan Caves to freedom in order to complete your commission.

THE ROCKET COPTER

Your rocket copter is controlled by the joystick. Moving the joystick in any direction causes your rocket copter to move in the chosen direction. As you change direction from right to left or vice versa the rocket copter turns to face forward and then continues the turn to the desired direction.

To fire your Interceptor rockets press the joystick fire button. If you are facing front you will release plasma-bombs instead of interceptor rockets.

Interceptor rockets are used to destroy Kraithan tanks, missile drones, impact shields, etc. Plasma-bombs destroy access doors, SPM's, etc.

FUEL

Your mission begins at your fuel depot. In order to fuel your rocket copter you must land on the fueling station. Upon landing, the top of the fuel tank will descend and you will drop down after it. Upon reaching the floor of the tank you will be refueled.

Your fuel level is constantly displayed at the left side of the command bar, to the left of the navatron.

THE NAVATRON

The navatron is a long range navigational aid. It will give you information about the terrain you are about to encounter as well as enemy units in the area.

KRALTHAN TANKS

Due to the advanced state of defense armor, tanks can be destroyed only by direct hits to the tank treads. The tanks launch drone missiles which track your rocket copter and quite often destroy it.

IMPACT SHIELDS AND ACCESS DOORS

Impact shields and access doors will be encountered at various points in the Kraithan defense system. They must be destroyed by plasma-bombs or interceptor missiles.

SPM'S (SELF-PROPELLED MINES)

SPM's contain plasma bombs and are deadly to your rocket copter. They float independently through the atmosphere and the Kraithan Caves.

ROBO-CHOPPERS

The Kraithan robo-choppers are android controlled attack helicopters. They are armed with missiles and hunt you relentlessly. Treat them with great respect.

PRISONERS

Prisoners are rescued by picking them up with your rocket copter.

LANDING PADS

White landing pads are scattered throughout the Kraithan Caves, the last place that you landed will be the spot (in case of destruction of your rocket copter), that your replacement copter will appear.

HYPER CHAMBERS

Hyper chambers are distinguished from laser chambers by their glowing nodes. If you are zapped in a hyper chamber you will be transported to any one of four identical chambers of your level.

CAUTION: If you rematerialize in another hyper chamber that already contains an SPM or robo chopper you will be destroyed.

ROTATING FIELD ENVELOPES

There are horizontal and vertical RFE shafts in the defense network with energy blocks that move through them. You must enter and keep ahead of the blocks to order to survive. Pressing the fire button changes the direction of the block movement.

FORT APOCALYPSE

The fort is destroyed by a well aimed missile from your rocket copter.
